

29. (Amended-Clean Text) The method according to claim 19, wherein the yoke is fabricated by laminating a plurality of yoke plates made by blanking the steel plate having predetermined length and width at one time.

REMARKS

By the above amendment, claims 15 and 29 have been amended to delete multiple dependency.

If there should be any questions, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

MARKED-UP COPY OF AMENDED CLAIMS

15. (Amended) The assembly of claim 6 [or 14], wherein a connecting projection and a connecting groove for coupling the yoke and the connecting portion are formed between the yoke and the connecting portion as high as the height of the yoke and the connecting portion.

29. (Amended) The method according to claim 19 [any one of claims 19 to 27], wherein the yoke is fabricated by laminating a plurality of yoke plates made by blanking the steel plate having predetermined length and width at one time.
